FORM 11-73

handle the dissemination requested in para 2 D and E of referenced message. Any blanket authority to release ORCON material without recourse to originator would require a community coordinated action. Pending successful resolution, a preliminary suggestion would be that DIA use the sanitized version (ORCON deleted) of the NIB which is prepared daily by CIA for their own overseas recipients and USIB community customers. This NIB cable version is sent nightly to SSO/DIA at a SIGINT/NOFORN classification.
